RAW ART

MOTIVATE CREATE EXPLORE

Childcare Program

RUNNING CREATIVE, HANDS-ON, EDUCATIONAL CHILDREN'S ART WORKSHOPS FOR OVER 30 YEARS.

We are a motivated and passionate team of professional teachers and artists, who love getting creative with children.

We have an exciting program on offer suitable for Kindys, Childcare Centres, ELC's and Pre-schools.
Program is suitable for 2-5 year olds, ranging from clay and printmaking to sculpture and mixed media.
Our workshops suit little hands and growing minds, and are sensitive to children's needs and requirements.

• Discover fun new processes • Learn a range of concepts • Build on literacy and numeracy skills
• Develop fine-motor skills • Finish each lesson with an exciting completed artwork

"We have had the pleasure of having Raw Art lessons with our Kindergarten children for the past 15 years. We are amazed at how organised and thoughtful their program is for the children. We love how they are adaptable, especially when there's a project or event where we can adjust the art schedule. We truly feel inspired after each art lesson, almost like a mini PD for our teachers and educators. Each child can follow the instructions and interpret the steps for their own individual creation."

EXPLORE

"We have had the pleasure of having Raw Art at our service for over 5 years, visiting our 2 Kindy cohorts. The children absolutely love their sessions and look forward to it each week. Our art teacher is kind, encouraging and exceptionally skilled at ensuring all our children are fully engaged with her lessons. Raw Art has been a wonderful selling point for our families, and offers us an edge on other services. The children leave on their art day proud to show their creations, explaining how and why they created them, taking home the fun facts and information they learned. We highly recommend Raw Art to any educational settings."

ALLY, **The Brook ELC Gordon Park**

RAW ART supports key outcomes from the Early Years Learning Framework (EYLF) through fun, structured creative sessions that nurture children's emotional and social development, as well as their problem-solving skills and critical thinking.

Tracy McDowall
