Hello wonderful educators!

Raw Art is 29 years young this year and as passionate as ever about bringing the Visual Arts into schools and igniting creative sparks in our children's lives. We LOVE developing our program of workshops and content each year for you and your students.

Our 2023 program is overflowing with new ideas and projects, with our unique mix of creativity, imagination, education and hands-on fun!

We have 24 NEW workshops ranging in media and themes, looking at different artists and art movements, exploring a range of concepts, all with the goal of developing your students' skill set and knowledge.

We understand technology and devices are not going away - but we are striving to remind children and educators of the importance of a balanced education where the world outside of screens is just as important and essential in developing critical thinkers.

Here's to another creative year of making, painting, drawing, weaving, moulding, threading, printing, thinking, doing, creating! Let's get busy!

Art has so many benefits in nurturing our children's growing minds.....

- Relieves stress and anxiety
- Encourages creative thinking
- Increases brain plasticity
- Boosts self esteem and confidence
- Enhances problem solving skills
- Encourages whole brain thinking
- Boosts focus and concentration
- Allows for mindfulness
- Improves fine motor skills
- Decision making skills are developed
- Observational skills are improved
- Language development
- Develop literacy and numeracy concepts

Tracy x

TRACY MCDOWALL -
